

APOLLO

Apollo shown with optional Carrier™ Roof-top Air Conditioning.

More Ways To Get You There

When hotels, municipalities, airports, shuttle and transit operators are looking for high quality, durability and superior handling, the Apollo is the obvious choice. Built on an MB55 Freightliner chassis, it has an ergonomic cockpit, seating up to 40 passengers and a full range of floorplans and options. With optional ADA-compliant equipment that makes it perfect for seniors or specialized transit routes, the Apollo delivers value-added transportation!

Adding to its stream-lined appearance, the Apollo boasts panoramic bonded windows with thick, tempered glass and full black-out paint. Along with Glaval's quality fit and finish, the results are an excellent looking and durable bus. Whatever the application, the Apollo is the answer.

“Steel-Safe” construction wraps passengers in strength and comfort. The subfloor of welded square tube steel is covered with 5/8” pressure-treated MarineTech plywood. A welded steel cage frame is filled with solid-block dense foam insulation and laminated to a galvaneal steel exterior skin and an interior wall of vinyl-covered luan for the side and rear walls that give you the durability and strength you need. Glaval buses have a 5 year/100,000 mile limited warranty.
